

## Attendance Recording System (ARS)

*MaCaPS Attendance Recording System records routine Personal Nursing Care Services to ensure procedure compliance.*

MaCaPS Attendance Recording System records routine Personal Nursing Care Services such as 2-hour position turning, skin care observation, physical restraint observation, intake/output charts monitoring etc. and ensures staff compliance and adherence to care procedures according to relevant care protocol guidelines. It will

- use RFID for identification and verification,
- provide wireless communication of data to CMAS,
- allow Interactive Audio Response and central/mobile Alter,
- support Instant Alert for High Risk Reading (HRR),
- enable historical data reviews and summary reports for on-the-spot care or nursing,
- fully integrate with CMAS for reporting and real time viewing of attendance information.

顏色	數量	質狀
正常	大	正常
啡	中	硬
黑	少	稀
紅		爛
綠		水狀
黃		有蟲
